

Centralise Subscriber Distribution, Contracts and Revenue in One Trusted Source with Medea from Argo Systems

EMEA distribution for the Pay-TV industry is rapidly expanding with new territories, operators and platforms. This opportunity presents significant challenges in managing this fragmented growth.

MEDEA, from Argo Systems, is the leading industry distribution management software with over 100 cable network customers worldwide. The only industry specific solution to effectively manage subscribers, contract terms, channel distribution, operator billing and customer relationships in one source!

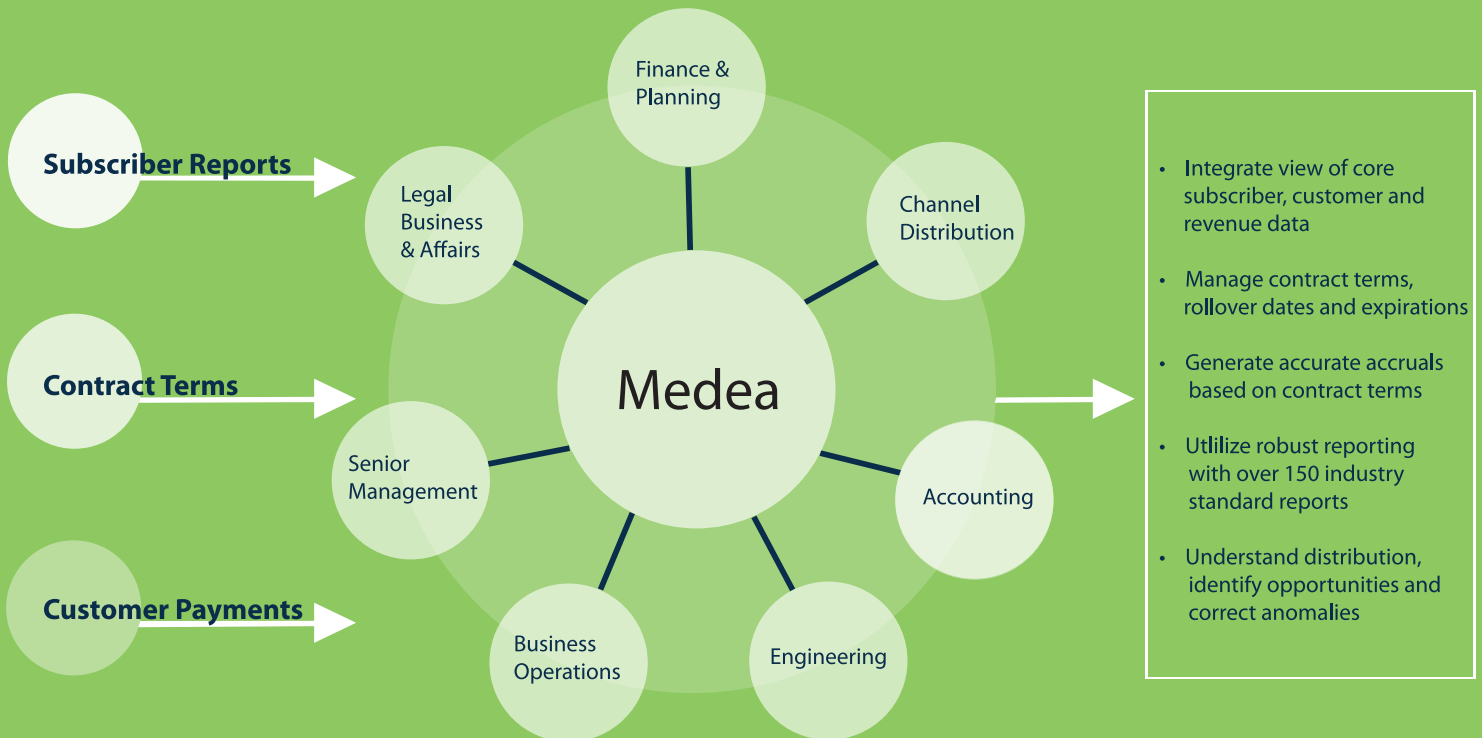

Increase Channel Distribution Visibility

- Gain visibility into current and prospective distribution by country, operator and platform
- Centrally manage increasing numbers of contracts with varying rates, renewal terms and expiry conditions
- Automate billings, accruals, and retroactive adjustments to ensure accurate receivables

Gain Accuracy and Efficiency with Subscriber Import and Automated Billing Processes

- Reduce risky manual data-entry and calculation errors to streamline accurate and timely billings
- Manage accruals, invoices and collections with multiple currencies and VAT
- Revalue receivables monthly based on updated exchange rates

Manage Your Channel Distribution and Revenue in One Source
